Deputy City Engineer – City of Oak Creek

The City of Oak Creek is seeking a Deputy City Engineer to serve as a senior leader within the Engineering Department. This position coordinates municipal engineering operations, private development review, infrastructure project delivery, staff and consultant oversight, and long-range infrastructure planning.

This role directly impacts public infrastructure and private development in a growing community while working across City departments and with developers, consultants, contractors, utilities, elected officials, residents, and other stakeholders.

Oak Creek stands prominently on the shores of Lake Michigan, ready for a period of growth and development. As one of the fastest-growing cities in southeastern Wisconsin, our population has increased by over 25% in the past two decades, and there's more to come. Oak Creek is at the center of this growth trend.

Job Duties

This position is directly accountable to the ACA/City Engineer and provides leadership and supervision for assigned Engineering Department staff and consultants. Key responsibilities include:

- Serve as the ACA/City Engineer's operational designee on assigned project, development, staff, and interdepartmental matters.
- Lead daily Engineering operations by coordinating priorities, workload, schedules, resources, and service delivery across development review, capital projects, field operations, and infrastructure-related activities.
- Oversee private development review and entitlement coordination, including Engineering comments, conditions, infrastructure requirements, agreements, and approvals.
- Provide high-level review and decision support for complex engineering, development, construction, infrastructure, and regulatory matters.
- Supervise and mentor assigned Engineering staff and coordinate consultant and contractor performance for assigned Engineering services.
- Direct capital infrastructure project delivery and support long-range infrastructure planning, including scope, schedule, budget, funding, asset needs, stakeholder coordination, and issue resolution.
- Respond to complex inquiries and support stormwater, drainage, floodplain, environmental, erosion control, and regulatory coordination.

Qualifications

Qualified applicants must possess a bachelor's degree in civil engineering or a related field and at least seven (7) years of responsible civil engineering experience, including at least two (2) years of supervisory experience. Previous experience in municipal design, construction, planning, and real estate is highly desirable.

OAKCREEK
— WISCONSIN —

A valid Wisconsin motor vehicle operator's license is required. Candidates must be registered as a Professional Engineer with the Wisconsin Examining Board of Architects, Professional Engineers, Designers, and Surveyors, or be able to obtain registration within six (6) months of starting employment with the City.

Qualified candidates should have strong knowledge of municipal engineering, public infrastructure systems, development review, capital project delivery, construction/contract administration, and applicable regulations. Candidates should also be able to lead staff, manage competing priorities, interpret plans, specifications, ordinances, agreements, and technical reports, exercise sound professional judgment, and communicate effectively with internal and external stakeholders.
